Silicone Scar Removal Tape

Skin colour

Silicone scar removal tape is a soft silicone dressing that has similar effects to the human skin. It is elastic, water repellent and permeable to moisture and air. The silicone scar removal tape helps to improve scar appearance (including hypertrophic and keloid) and restores skin to a more natural color and texture. It alleviates itchy skin and discomfort associated with scars.

Applications

Silicone scar removal sheet can be used on various scars including surgical scars, wound scars, hypertrophic burn scars, contractures burn scars, keloid burn scars and discoloured swollen scar.

Features

Gentle on skin

Permeable to moisture and air

Water repellent

Flexible and highly conformable

Strong adhesion yet comfortable

Washable and reusable

Specifications

Silicone gel PH : PH 6.8
