## Universiti Sains Malaysia (USM) Undergraduates' Industrial Visit to K-One's Plants in Ipoh, Perak

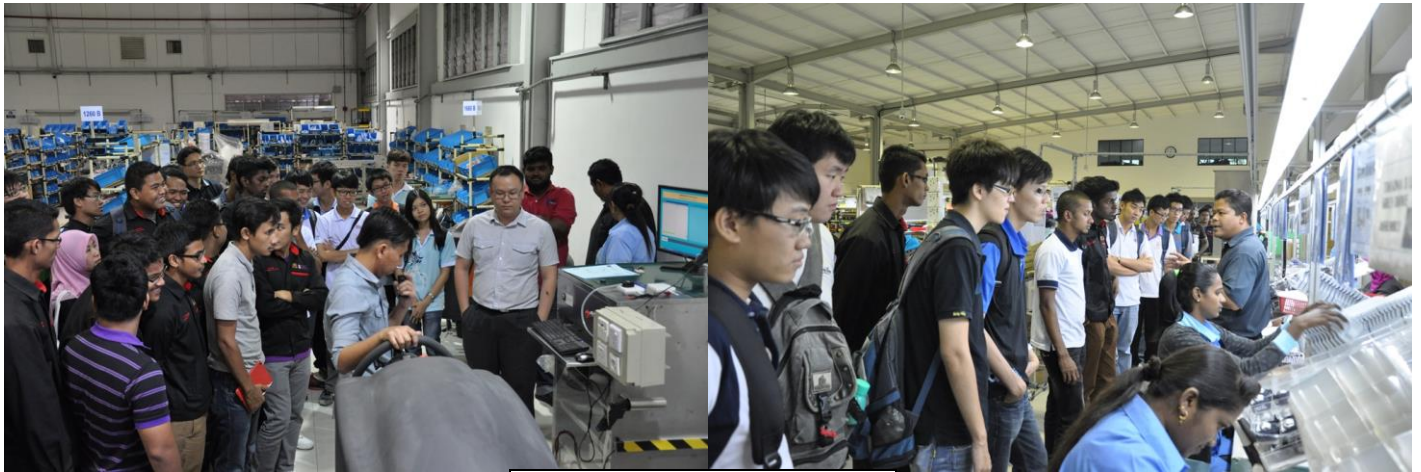

On 27 May 2015, forty-four second year Mechatronic Engineering undergraduates and two accompanying staff from University Sains Malaysia (USM) visited K-One's plants in Ipoh, Perak.

The entourage was from the School of Electrical and Electronic Engineering, University Sains Malaysia. Mr. Lim Yew Kee, the invited industrial speaker for Mechatronic courses in University Sains Malaysia, has again recommended the K-One Group as the ideal enterprise for a holistic exposure in the design and manufacturing of electronic end products in the country.

Briefing by our engineering and production staff

During the plant visit, the undergraduates learnt the engineering functions in design and development of electrical and electronic products and also observed the manufacturing process flow. K-One's engineering staff explained that electrical/electronic engineers tend to work in a multi-disciplinary team encompassing project engineers, sales staff, quality assurance engineers and manufacturing operations staff. They added that electrical/electronic engineers need to be able to project manage and multi-task over and above having technical knowledge. More importantly, having commercial awareness and other attributes such as business acumen, team leadership or management skills will be added assets as one's career progresses.

Tour of the production plant

The USM entourage was briefed on how K-One's manufacturing operations are integrated into the Group's overarching sustainability priorities. As a Group that is a Certified Sony Green Partner by Sony Corporation Japan, ISO 9001, ISO 14001 and ISO/TS 16949; K-One's practice of sustainable manufacturing has reaped increase in operational efficiency and enhanced competitiveness through reduction in waste and cost, environmental, safety and health positive impacts. The accompanying lecturer, Dr. Wan Amir Fuad Wajidi bin Othman, advocated our environmentally friendly design and manufacturing processes is earning the K-One Group par excellence in Malaysia's electronic and electrical manufacturing industry.

Cheers to a fruitful visit

It was an honour that the School of Electrical and Electronic Engineering of USM recognises K-One as a stalwart enterprise whose strength is in the provision of total integrated product engineering solutions. We are proud that our precept of sustainable design and manufacturing have solidified our reputation in productivity and economic value generation!
