

7 June 2018

INNOVATION DAY PROJECT CONTEST

In line with K-One's business focus in generating and driving creativity and innovation in the industry and ecosystem alike, it took the opportunity to appraise and sponsor prizes for the winners of projects submitted by undergraduates from the Faculty of Engineering and Computing of First City University College (FCUC) located in Petaling Jaya in conjunction with their Innovation Day held on 5 June'18.

Vice-Chancellor of FCUC , Prof Dr. Mark Chai presenting token of appreciation to Ir. Edwin Lim, Chairman of K-One.

Innovation Day serves as platform for graduating students of FCUC to present their final-year degree projects. It also acts as a channel for the graduating students to connect with the industry to enhance their learning experience.

All smiles for members of FCUC, K-One and KiasuLab to end the day.

Besides K-One's innovation driven mission, it has always been K-One's belief in caring for the community and contributing to community development through a wide range of corporate social responsibility activities. Through this collaboration with FCUC and sponsorship of prizes for winners of outstanding engineering and computing projects, K-One hopes to motivate the millennials to develop a passion for engineering, computing, creativity and innovation. Furthermore, we trust the feedback from professional judges from the

industry ie K-One would enhance the learning experience of the undergraduates from a commercial perspective.

K-One's professional judges reviewing a Computing project.

The best three (3) projects in the Engineering and Computing categories respectively were awarded RM500, RM300 and RM200 each under the K-One Special Awards. The winners were selected through professional assessment by K-One engineers or staff based on four (4) criteria: Commercial Value (40%), Technical (30%), Creativity (20%) and Presentation Skill (10%).

We are done!

K-One Special Award for Engineering Projects
