## TRAINING FOR K-ONE'S HEALTH & SAFETY CHAMPIONS ON COVID-19 RTK ANTIGEN TEST KIT USE

The Covid-19 pandemic has proved to be a major challenge to the manufacturing industry as the highly infectious disease continues to wreak havoc on supply chains globally. The number of Covid-19 cases in Malaysia continues to soar in recent weeks despite the earlier re-imposition of versions of the enhanced Movement Control Order (MCO).

In spite of these trying times, K-One has remained resilient and continued to operate with care its anchor businesses consisting of EMS (healthcare bias) and Cloud by implementing various SOPs and precautions. The Health & Safety (H&S) task force in K-One has been kept busy since the beginning of the pandemic to tackle the potential risks and challenges inflicted by the Covid-19 pandemic. This H&S task force is spearheaded by our Health & Safety officers, Mr. Thong Yik Wai and Ms. Jennifer Leong.

*K-One's H&S task force headed by Mr. Thong*

In essence, the Management is focussing on 8 important elements to safeguard its operations and employees:

1. Complying to MITI/MOH regulations to operate during MCO
2. Self-screening among employees
3. Abide by cleaning and sterilization procedures
4. Implement social distancing guidelines
5. Personal hygiene and personal protective equipment (PPE) practice
6. Activity control within workplace
7. Emergency preparation measures
8. Emergency response procedures

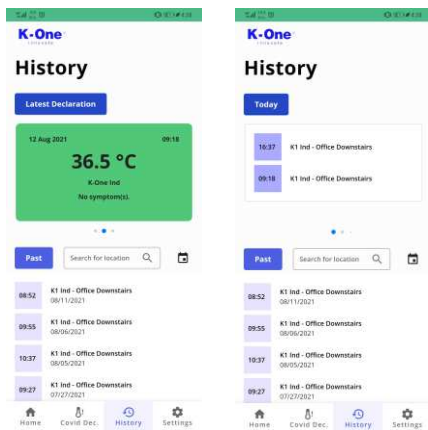

With all these factors in mind, the H&S task force managed to establish an effective action plan in preventing and mitigating Covid-19 infections at its workplace, which is applicable to all employees and contractors of K-One. So far, K-One has maintained a clean record in keeping its manufacturing operations running and its employees safe.

*Minimum 1m social distancing among staff during briefing session*

Having extensive knowledge in cloud technology and IoT (Internet of Things), K-One has been able to grasp the opportunity to digitally transform its business activities to a New Normal. Business meetings with customers or suppliers, staff meetings and factory audits are no longer conducted face-to-face but done remotely via virtual meeting platforms such as Zoom, Google Meet and Microsoft Teams.

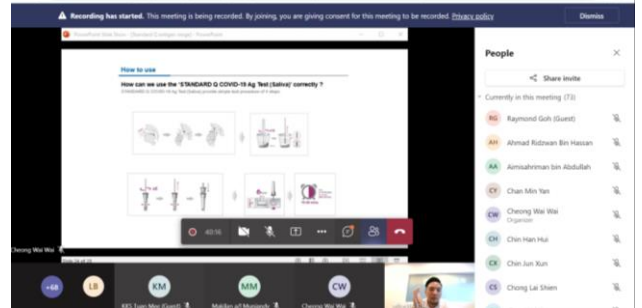

Traceability of its staff within the K-One facilities are monitored online via K-One's very own mobile app - K1Tracer which allows the H&S task force to log and trace the movement history of each staff.

*Daily declaration and log history of K1Tracer*

*K-One staff meeting via Zoom*

*K-One's H&S team attending Covid-19 RTK Antigen Test Kit Use Training*

*Employee screening by our H&S champions*

K-One has always actively encouraged all of its employees to be inoculated as soon as possible under the government's mass vaccination program in playing its role to help the country achieve herd immunity.

To enhance manufacturing operation safety, K-One has taken the initiative to conduct selective in-house COVID-19 screening on employees and security guards. Towards this end, the H&S team attended specific training course on how to use the COVID-19 RTK Antigen Saliva Test Kit provided by the Authorized Representative. Our H&S champions are now certified professionals to use the test kits, enabling them to effectively screen employees/associates and also impart the same knowledge to third parties.
