K-One Participated in BIOMEDevice Trade Exhibition in US.

As business travels gain traction after the COVID-19 pandemic, industry players sought opportunity to capitalize on the momentum to capture new markets. The K-One's business development team travelled across the globe in September'23 to showcase its medical devices and manufacturing competencies in the BIOMEDevice exhibition held in Boston, US at the Boston Convention and Exhibition Center from 20th to 21st September 2023.

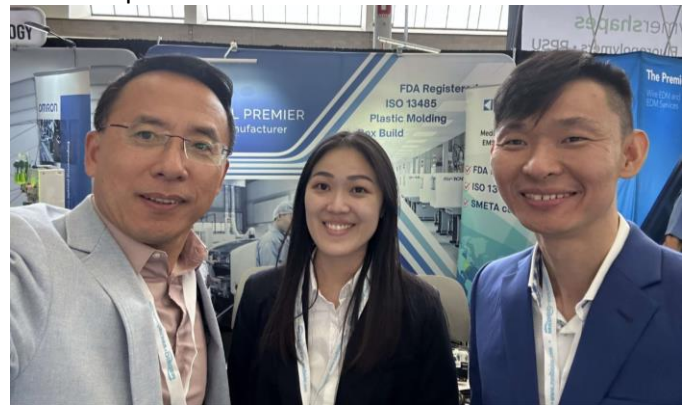

City of Boston

A total of 231 exhibitors participated in this event which mainly focuses on new manufacturing technologies, solutions and engineering of medical/healthcare devices. Many business leaders, procurement specialists and innovators from global medical device OEMs and top start-ups attended this reputable exhibition.

Despite facing an onslaught of fierce competition among fellow exhibitors, K-One's team garnered tremendous interests from various multinationals to develop and manufacture their products in Malaysia. Armed with FDA registration and ISO 13485 certification, K-One

proves to be an attractive manufacturing service and solutions provider in Asia.

A wefie snapshot with our early birds.

Curious customers from medical sector enquiring on K-One's manufacturing capabilities.

Looking ahead, K-One will continue to expand its footing in the medical/healthcare sector and EMS industry. K-One's team has lined up an exhibition roadmap to cover other major cities/areas such as the Silicon Valley and Anaheim in the US. There is definitely more excitement and potential business in the horizon. Let us give kudos to the K-One business development team!
