G-AsiaPacific's 4th Win of Top AWS Partner of the Year (Malaysia)

01 Jun 2026, 08:00 am

7 Golden Jackets, global finalist for MSP, 1st Premier Tier partner with MSP specialisation in the country

"Mark Goh, CEO and Co-founder of G-AsiaPacific, receiving the AWS Partner of the Year Malaysia award."

KUALA LUMPUR, MALAYSIA, 1 JUNE 2026. G-AsiaPacific Sdn Bhd (G-AsiaPacific), a wholly-owned subsidiary of K-One Technology Berhad (listed on Bursa Malaysia), is proud to announce it is the recipient of the **AWS Partner of the Year (Malaysia) 2026 at AWS Partner Summit ASEAN for the 4th time**, which recognises AWS Partners playing key roles in driving customer innovation on Amazon Web Services (AWS). G-AsiaPacific has been named the winner of **AWS Partner of the Year (Malaysia) 2026**, recognising the top AWS Consulting Partner that has provided significant contributions related to revenue growth, launched new business opportunities, net new certified individuals, and AWS designations earned.

This marks a historic **fourth time** that G-AsiaPacific has received this prestigious recognition, following wins in 2019, 2021, and 2024. No other AWS Partner in Malaysia has achieved this milestone, cementing G-AsiaPacific's position as the nation's most accomplished cloud solutions provider.

Announced during the AWS Partner Summit in Singapore held on 5th May 2026, AWS Partner Awards recognise AWS Partners that have embraced specialisation, innovation, and cooperation over the past year. The awards celebrate those whose business models continue to evolve and thrive on AWS as they support their customers' cloud transformation journeys.

7 Golden Jackets: The Strongest Delivery Bench in Malaysia

Beyond the award, G-AsiaPacific continues to raise the bar in technical excellence. The company now holds **seven AWS Golden Jackets regionally**, the highest number among all AWS Partners in Malaysia. The AWS Golden Jacket is a rare and coveted distinction awarded by AWS to individuals who demonstrate exceptional delivery capabilities, deep technical expertise, and outstanding contributions to customer success.

These seven Golden Jacket holders span three distinct functions, namely Business Development, Solution Architecture, and Technical Delivery, ensuring that AWS mastery is embedded across the entire customer lifecycle, from strategic advisory and solution design to implementation and ongoing managed services. This cross-functional depth is what sets G-AsiaPacific apart and reinforces the company's reputation as the go-to partner for complex, mission-critical cloud projects.

G-AsiaPacific also holds the distinction of being Malaysia's first homegrown **AWS Premier Tier Services Partner** and a certified **AWS Managed Services Provider (MSP) Partner**. These designations represent the highest levels within the AWS Partner Network, awarded to a select group of partners that demonstrate consistent customer success, deep technical proficiency, and the ability to manage complex cloud environments for enterprise clients.

*"Winning this top award **for the fourth time** is humbling beyond words. We've invested deeply in building the strongest technical specialisation and competencies in the country, with seven AWS Golden Jackets and Premier Tier credentials with MSP specialisation that very few can match. But what excites me most is the road ahead. With our Vietnam team now recognised as a finalist for AWS Partner of the Year, we're bringing that same standard of excellence beyond Malaysia across ASEAN, helping businesses in every industry harness AI, cloud, and data to compete on a global stage."* - **Mark Goh, CEO and Co-founder of G-AsiaPacific**

Growing Regional Footprint: Vietnam Finalist Nomination

Adding to the celebrations, **G-AsiaPacific Vietnam** has been nominated as a **Finalist for AWS Partner of the Year (Vietnam)** at AWS Partner Awards 2026.

This nomination signals that G-AsiaPacific's commitment to excellence is extending beyond Malaysia, driving meaningful impact across ASEAN markets.

Empowering Industries Across Malaysia and ASEAN

For over a decade, G-AsiaPacific has supported a diverse range of Malaysian customers, from diversified cross-industries, and enterprises to small and medium-sized businesses (SMBs), independent software vendors (ISVs), and startups, on their cloud transformation journeys.

The company's solutions span key industries including retail, manufacturing, logistics, automotive, healthcare, financial services, and conglomerate groups, driving tangible outcomes in cost optimization, operational efficiency, and innovation on AWS.

With deep capabilities in cloud migration, AI, data analytics, and more on AWS, G-AsiaPacific enables organisations of all sizes to modernise faster and turn cloud investments into real business outcomes.

Shaping Malaysia's Digital Future

With the continued growth of the cloud ecosystem in ASEAN and the increasing adoption of AI and generative AI technologies, G-AsiaPacific remains committed to helping Malaysian businesses stay ahead of the curve.

The company's deep relationship with AWS, combined with its unmatched credentials and technical bench strength, positions G-AsiaPacific as the go-to partner for organisations looking to accelerate their digital transformation on AWS.

As Malaysia continues its trajectory towards becoming a regional digital economy powerhouse, G-AsiaPacific stands ready to lead the charge, empowering businesses to innovate, scale, and compete on a global stage.

About G-AsiaPacific Sdn Bhd (G-AsiaPacific)

G-AsiaPacific, a wholly-owned subsidiary of K-One Technology Berhad (listed on Bursa Malaysia), is Malaysia's leading cloud solutions provider and a born-in-the-cloud company with over a decade of collaboration with AWS.

The company is a four-time AWS Partner of the Year for Malaysia (2019, 2021, 2024, 2026), an AWS Premier Tier Services Partner, an AWS Managed Services Provider (MSP) Partner, and holds the highest number of AWS Golden Jackets among partners in Malaysia with seven regionally. G-AsiaPacific serves customers across the ASEAN region, delivering transformative cloud solutions in migration, modernisation, managed services, AI/ML, generative AI, IoT, and data analytics on AWS.
